
Great Books from Aeronaut Books!

May 2023

New: EPUB editions are available for some titles as noted in this catalog.

Jasta Colors Volume 2

Jasta Colors Volume 2 is the second volume in a landmark series by the world's leading authority on its subject of the development of German fighter markings. The book begins with the first personal markings of the airplanes 1914 – 1916, as these markings are the model for the markings used by the Jagdstaffel from 1916 to the end of the war. In the focus are the markings of the first 10 German Jagdstaffel in 1916 to the winter of 1916/1917. The story is told with 286 photos, 45 in color, and color profiles of 47 aircraft with 20 supplementary color profiles in its 242 pages.

ISBN: 978-1-953201-01-0

Retail price \$59.99

Jasta Colors Volume 1

Jasta Colors Volume 1 is the first volume in a landmark series on this popular and hotly debated subject by the world's leading authority. This volume gives extensive information on research and sources on this topic supported by 223 photos, 61 documents, 4 color paintings, and 55 color profiles, many with plan views and many not seen before, in its 274 pages.

ISBN: 978-1-953201-00-3

Retail price \$69.99

Royal Bavarian Jagdstaffel 76 is the third book in the milestone series on WWI German fighter units, their pilots, and the colors and markings of their aircraft by the authors. The book is based on the personal diary of the Staffelführer Lt. Böning who day by day wrote down his experiences – a unique document. It includes excerpts from its war diary, a list of its personnel, and other data. This book was instigated by discovery of a derelict aircraft from this unit in a swamp in France that was restored by the Aéroplane Restoration Management team; the book includes some photos of that process. The story is told with 174 photos, 31 in color, color profiles of 36 aircraft, and 4 maps in its 204 pages. Soft bound.

ISBN: 978-1-935881-43-0

Retail price \$49.99

Great Books from Aeronaut Books!

Royal Prussian Jagdstaffel 23 is the second book in the milestone series on WWI German fighter units, their pilots, and the colors and markings of their aircraft by the authors. The book has 341 photos, hundreds of them previously unpublished, and color profiles of 68 aircraft created specifically for this book. The author has also created 17 maps showing the location of every victory and loss. The cover painting by noted artist Russ Smith was commissioned especially for this book. 368 pages. **Hard bound.**

ISBN: 978-1-935881-63-6

Zeebrugge. Facing the Thames Estuary across the English Channel, the German naval aviators of *Flandern I*, later *See I*, fought a determined war against British air and sea forces throughout WWI. Zeebrugge, the anchor of the seaward extension of the Western Front into the English Channel and North Sea, was the most important German naval air station of the Great War, and this book, written by a German historian and translated into English, tells the story of its men and machines in text, 333 photographs and illustrations, and 47 color profiles. The book is **hard bound** and has 328 pages.

ISBN: 978-1-935881-46-9

Retail price **\$64.95**

The Belgian Air Service in the First World War is the definitive story of the men, machines, and operations of the valiant Aviation Militaire Belge from its inception until the Armistice. **Hard bound.**

- 728 pages and more than 1,000 period photographs
- Combat chronology of the Belgian Air Service every day of WWI
- Complete lists of victories and casualties
- List of all Belgian airplanes and a section on the Belgian GN series
- Biographies of 375 Belgian aviators, 320 with photos
- 24 pages of color featuring 81 color profiles of Belgian warplanes

ISBN: 978-1-935881-01-8

\$99.95

- Menckhoff's story in his own words with commentary by the author.
- 304 pages, 208 photos (14 in color), maps and illustrations
- Text in both English and German
- 3 color profiles of Menckhoff's fighters
- **Hard bound**

Carl Menckhoff: Reminiscences of War and Captivity is the compelling story of one of the great aces of the war. Brought down by neophyte American pilot Walter Avery, Menckhoff was captured. The story continues until today with the Avery family's touching return of Menckhoff's white 'M' to Menckhoff's family.

ISBN: 978-1-953201-18-8 **\$29.99**

The Blue Max Airmen volume 17 covers little-known 54-victory ace Erich Loewenhardt and notorious ace Hermann Göring. Volume 17 includes 160 photographs and 15 color illustrations of aircraft flown by these aces in its 156 pages.
ISBN: 978-1-953201-38-6 **\$39.99**

The Blue Max Airmen volume 18 covers fighter aces Rudolf Windisch and Hans Kirschstein and observers Friedrich Niebock and Wilhelm Schreiber. Volume 18 includes 104 photographs and 10 color profiles of aircraft flown by these men in its 102 pages.
ISBN: 978-1-953201-41-6 **\$29.99**

The Blue Max Airmen volume 19 covers fighter aces Otto Kissenberth, Emil Thuy, and Fritz Rumey and balloon observer Peter Rieper. Volume 19 includes 195 photographs and 19 color profiles of aircraft flown by these men in its 166 pages.
ISBN: 978-1-953201-47-8 **\$39.99**

Fokker D.II of *Kest* 4b, Freiburg Aerodrome, 1916

Roland D.VIa of *Lt.d.R.* Emil Koch, *Staffelführer* of *Jasta* 32b and an ace with 7 victories.

Great Books from Aeronaut Books!

Jean Navarre: France's Sentinel of Verdun

and the First French Fighter Pilots

by Jim Wilberg

With aviation's rapid growth in the Great War came air combat and the beginning of fighter aviation. Jean Navarre became the archetypal fighter pilot, the first French ace of aces, who, together with other brave airmen, created fighter aviation. They were a legend in their own time, and this is their story.

- 133 period photos and drawings in 104 pages
- Color profiles of 16 aircraft, 7 with plan views
- Five professional paintings of early air combat
- Brief biographies of Pegoud, Garros, and 10 other important early French aviators. **Offset printed.**

ISBN: 978-1-935881-00-1

\$24.95

Grim Reapers – French Escadrille 94 in World War I

Noted historian Jon Guttman tells the story of a typical French fighter escadrille during World War I with text, 105 rare photos (8 in color), and 16 new color profiles. The book has 94 pages, and is of interest to aviation historians, enthusiasts, and modelers alike.

ISBN: 978-1-935881-40-7 \$29.99

Victoria Cross WWI Airman and Their Aircraft

by Alex Revell (2nd edition)

This book by noted historian Alex Revell tells the story of the 19 British pilots who were awarded Britain's highest award for valour during WWI. These biographies are illustrated with 144 photos and 42 color profiles of aircraft flown by these men, including all the aircraft flown in the Victoria Cross actions. The book has 156 pages and is of interest to aviation historians, enthusiasts, and modelers alike.

ISBN: 978-1-935881-41-4

\$34.99

The Happy Warrior

by Alex Revell. This is the story of a remarkable young man: James McCudden.VC; DSO+Bar; MC+Bar; MM; *Croix de Guerre*; America Medal of Honour and Merit. Following his family's military tradition, James McCudden began his career as a professional soldier in 1910, at the age of 15, as a bugle boy in the Royal Engineers.

At the outbreak of war James McCudden was an engine mechanic, but within four years, by sheer hard work and devotion to duty he had risen through the ranks to be a highly decorated Major: a fighter pilot with 56 official aerial victories to his credit. But his success as a fighter pilot was only part of his worth. Unlike many of his contemporaries McCudden studied the tactical aspects of air fighting, applying them to what he saw as his most important duty as a Flight Commander: to minimise the casualties suffered by his Flight. He was tragically killed in a flying accident in July 1918, flying to France to take command of a squadron. The book has 304 pages, 275 photos, and 4 color profiles. An EPUB edition is \$9.99.

ISBN: 978-1-935881-34-6

\$29.99

Inside the Victories of Manfred von Richthofen

Comprehensive Victory Summaries and Combat Statistics by James F. Miller

This is a heavily-illustrated, comprehensive summary of all 80 victories of the famous Red Baron, the leading ace of WWI. Full details of each victory are given, including color profiles of the aircraft flown by Richthofen, the type and serial of the downed aircraft, the names of the crewmen and their fate, etc. So much information is provided that two volumes were necessary.

Volume 1 covers von Richthofen's career up to his wounding in action on 6 July 1917 and has 203 photos (81 in color), 12 illustrations (8 in color), and 240 pages.

ISBN: 978-1-935881-42-1 \$49.99

Volume 2 covers von Richthofen's career from his wounding in action on 6 July 1917 until his death in action and has 163 photos (44 in color) and color profiles in its 234 pages.

ISBN: 978-1-935881-43-8 \$49.99

The Thomas-Morse MB-3 tells the story of the first American-designed production fighter. Designed during The Great War, it first flew in February 1919, after the Armistice. In 1927 it starred in *Wings*, the first movie to win an Oscar for Best Picture. Historian Jan Forsgren tells the story with authoritative text, 93 photos, 24 drawings, 14 color profiles, and 1/48 scale drawings of the MB-3 and MB-3A.

ISBN: 978-1-953201-23-2

\$24.99

German Aircraft in Polish Service Volume 1 is the first in a series of books documenting WWI German warplanes in postwar Polish service. The series is based on Polish archives; written by Polish authors it gives the never before told detailed history of these machines in the turbulent postwar period when Poland had to fight for its borders with Germany, Ukraine, and Soviet Russia. Volume 1 covers the Halberstadt Cl.II, Cl.IV, and C.V, the LVG C.VI, and the Hannover Cl.V and tells the story with 94 photos, 6 in color, and 22 color profiles in its 82 pages.

ISBN: 978-1-953201-58-4

Retail price \$29.99

Swedish Military Aircraft 1911-1926 concerns itself with the airplanes operated by the Marinens Flygväsende (Naval Aviation Service) and Arméns Flygkompani (Army Aviation Company) between 1912 and 1926, prior to the establishment of an independent Flygvapnet on July 1, 1926.

Separate chapters cover the airplanes of Marinens Flygväsende (Naval Aviation Service) and Arméns Flygkompani (Army Aviation Company), as are those ordered or considered, but not delivered. The final chapter includes detailed information on preserved airplanes. The book contains 142 pages, with 165 photos, including 16 in color, and 19 color profiles.

Great War Aviation Centennial Series

From Aeronaut Books, by Jack Hervis & others. Soft-bound, letter-size (8.5"x11") pages. Free Media Mail shipping in USA. These books are of interest to aviation historians, enthusiasts, and modelers alike.

Development of German Warplanes in WWI

A Centennial Perspective on Great War Airplanes and Seaplanes #1

This book describes and illustrates the development of German warplanes in WWI with text, photos, color illustrations, and 30 tables of information including front-line inventories of aircraft by date and specific type. The origins and evolution of each warplane class or category, such as fighters, bombers, and reconnaissance planes are discussed in chapters for each category. Aero engines are also discussed, together with procurement decisions and production quantities. German aviation production and procurement strategies are discussed in the context of the German strategic situation. The three German Fighter Competitions are discussed in particular detail, including all the participating aircraft and their engines. The book is illustrated by 200 rare, contemporary photos, 12 color photos, and 62 color profiles; 148 pages.

ISBN: 978-1-935881-08-7

\$34.99

German Seaplane Fighters of WWI

A Centennial Perspective on Great War Seaplanes #2

This book describes and illustrates the development of German Navy seaplane fighters in WWI with text, 223 rare, contemporary photos, nine color photos, 27 color profiles, five evocative paintings, and tables of information including production quantities and serial numbers of aircraft and technical specifications. The origins and evolution of each subclass of naval fighter, including single-seat floatplanes, single-seat flying boats, two-seat biplanes, and two-seat monoplanes are discussed in chapters for each class. German naval fighter production and procurement strategies are discussed in the context of the German strategic situation. In addition, the book includes 1/48 scale drawings of 8 aircraft types (the Brandenburg KDW, W16, W19, W25, W33, and W34 and the Rumpler 6B1 and 6B2) in its 150 pages.

ISBN: 978-1-935881-09-4

\$34.99

Nachtflugzeug! German N-Types of WWI

A Centennial Perspective on Great War Airplanes #3

This book describes and illustrates the development of German single-engine night bombers, or N-types, in WWI with text, 54 rare, period photos, 7 color photos, 9 color profiles, tables of information including production quantities, serial numbers of aircraft, technical specifications, 1/48 scale drawings of the AEG N.I and Sablatnig N.I, and 1/72 scale drawings of the BFW N.I. The origins and evolution of the N-class are discussed in the context of the German strategic and tactical situation. The book has 44 pages. ISBN: 978-1-935881-10-0

\$14.99

German Armored Warplanes of WWI

A Centennial Perspective on Great War Airplanes #4

This book describes and illustrates the development of German armored warplanes in WWI, primarily J-class infantry aircraft but including other experimental types, with text, more than 160 rare, contemporary photos, 38 color profiles, and tables of information including production quantities and serial numbers of aircraft and aircraft size and performance specifications. The origin and evolution of the armored warplane designs are discussed in the context of the German strategic situation and the evolving combat environment. Scale drawings of the AEG J.I and J.II and the Albatros J.I and J.II to 1/48 scale are included in the book's 116 pages.

ISBN: 978-1-935881-11-7

\$34.99

Pfalz Aircraft of WWI

A Centennial Perspective on Great War Airplanes #5

This book describes and illustrates the development of Pfalz aircraft in WWI, primarily fighter aircraft, with text, 530 photos (28 in color), 81 color profiles, 10 color illustrations, production quantities and serial numbers of aircraft and aircraft dimensions and performance specifications. In addition, 15 Pfalz aircraft types are illustrated in both 1/72 and 1/48 scale drawings. It is a revised, enlarged edition of a book first published in 2001. The book has 264 pages.

ISBN: 978-1-935881-12-4

\$29.99

Germany's Fighter Competitions of 1918

A Centennial Perspective on Great War Airplanes #8

This book describes and illustrates the three German Fighter Competitions of 1918 and expands on that to tell the larger story of German fighter development in the last year of WWI. The fighter competitions and fighter development are discussed in the context of Germany's strategic situation and the evolving combat environment with text, 215 rare, period photos, 10 color photos, 65 color profiles, and 1/48 scale drawings of nine fighters (the Aviatik D.VI & D.VII, Daimler L 11, Fokker V29, Kondor D.II, D.VI, & E.III/IIIa, SSW D.VI, and Zeppelin D.I). The book has 166 pages.

Genesis of Fighter Aviation in WWI

A Centennial Perspective on Great War Airplanes #20

This is the story of the origin and development of fighter aviation during World War I, the first air war, and the legend of the fighter ace. The story combines the exploits of the aces, the evolution of combat tactics, and the technical development of fighter aircraft from its primitive beginnings to the armistice, presaging the aerial arms race that continues today, when the fighter is the key offensive aerial weapon. The book has 550 photos (36 in color), 170 color profiles, and 280 pages, and is of interest to aviation historians, enthusiasts, and modelers alike. An EPUB edition is available for \$19.99.

The Great War's Finest **An Operational History of the German Air Service | Volume 1: Western Front 1914**

The Great War's Finest series is the first detailed operational history of the German Air Service during the Great War (1914–1918), the first war in the air. Volume 1 covers in unprecedented detail the creation, organization, and operational history of the *Fliegertruppe* over the Western Front in 1914. Drawing upon a wide range of rare primary sources, Volume 1 provides the reader with a unique narrative that explains the relationship between German air and ground forces and the *Fliegertruppe's* dramatic impact on the epic battles of the Western Front in 1914. Lavishly illustrated, Volume 1 includes 35 color maps, 165 photos and postcards, 72 of which are in color, and several color profiles of 1914 German reconnaissance airplanes in its 378 pages. Extensive order of battle information and other important data are summarized in the appendices. The Great War's Finest is a landmark contribution to the study of aerial operations during World War I. An EPUB edition is available for \$19.99.

Sumner Sewall | Maine's First World War Fighter Ace by James Wilberg

is the story of Sumner Sewall, Maine's WWI fighter ace, during his flying career. Sumner flew with the 95th Aero Squadron, U.S.A.S., of the First Pursuit Group, where he fortunately survived the harrowing experience of being shot down in flames to achieve aceship. Many of Sumner's contemporaries remain in France, having sacrificed their lives in the Great War. Fortunately, Sumner returned home after the war and was prominent in Maine business and political life, later serving as governor of Maine during WW2. The book has 25 paintings and posters, 187 photos, 18 in color, and color profile and plan views of 3 aircraft in its 154 pages.

August Euler & His Airplanes 1908 – 1920

A Centennial Perspective on Great War Airplanes #32 & #33

August Euler was a very important German aviation pioneer; he gained German pilot's license No.1, designed and built airplanes, was a flight instructor, created a flight school, and founded an aircraft company bearing his name. After WWI he served as Germany's first Secretary of State for aviation. This is the story of Euler and his aircraft for the first time in English. It is translated and expanded from *Abenteuer Gelber Hund* by Michael Düssing. The book is published in two volumes totaling 440 pages with 396 photos and 136 drawings and other graphics plus 1/48 scale drawings of six Euler aircraft.

Volume 1 has 206 pages, 235 photos, 32 graphics, and scale drawings of 2 aircraft.

Volume 2 has 234 pages, 161 photos, 136 graphics, and scale drawings of 4 aircraft.

Junkers Aircraft of WWI Volumes 1 & 2

A Centennial Perspective on Great War Airplanes #30 & #31

These volumes by noted historian Colin A. Owers discuss and illustrate the world's first all-metal airplanes, including the development of their all-metal structural technology as well as the aircraft themselves. Numerous photographs and contemporary drawings are included, and each volume includes scale drawings of three aircraft types. These volumes provide the most detailed and complete coverage of these aircraft ever published.

Volume 1 has 356 photographs, including 82 in color, and color profiles of 13 aircraft. Volume 2 has 229 photographs, including 30 in color, and color profiles of 14 aircraft. It also includes 7 color images illustrating factory colors and markings.

Patrolling the North Sea in WWI

Patrolling the North Sea in WWI is the story of Sir Austin Robinson, a young RNAS pilot who flew flying boats and floatplanes over the ocean in search of German airships and submarines. Much of the story is told in Robinson's own words taken from his letters home by his son-in-law, Robin Jeffrey, and is edited by noted historian Colin A. Owers, who provides supplementary background and photos. This personal memoir tells the human side of the story of the America flying boats whose technical development is told in the two-volume *The Fighting America Flying Boats of WWI* by the same author. The book has 170 pages, 134 photographs, and 16 color profiles.

ISBN: 978-1-935881-87-2

Retail price \$39.99

Otto, AGO, and BFW Aircraft of WWI

A Centennial Perspective on Great War Airplanes #37

This book tells and illustrates the story of these interrelated companies and development of their aircraft. The Otto Pusher, Ago Pusher, Otto C.I, and the Ago C.I were the only single-engine pusher aircraft used by the German Army during the war, the Prussian Air Service having a strong preference for the tractor configuration. The Ago C.I was used in far greater numbers than the other types and was the type most familiar to Allied airmen. This book illustrates the development and use of these types plus the later, tractor types in 382 photos, 23 in color, and 32 color profiles. In addition, scale drawings of 7 of the most important types are included in the book's 244 pages.

ISBN: 978-1-935881-78-0

War Wings Over Galicia 1918-1919

War Wings Over Galicia tells the aviation story of the forgotten 1918-1919 war between a newly resurrected Poland and independent Ukraine. In the aftermath of The Great War and the fall of empires, newly-formed countries struggled with one another over their borders. Poland and Ukraine gathered WWI airplanes from wherever they could and these aircraft supported their respective armies with reconnaissance and bombing missions and occasionally met in aerial combat. Polish historian In this book Andrzej Olejko tells the story of this forgotten conflict from the Polish point of view. The book has 306 photos (19 in color) and 11 color profiles in its 212 pages. An EPUB edition is also available for \$14.99.

Seefrosta

Seefrosta, Seefrontstaffel Flanders October 1917 – August 1918 by noted historian Michael Schmeelke tells the story of this unique combat unit on the coast of the English Channel in the last year of the war. The Seefrosta flew land-based fighters and reconnaissance aircraft in support of the naval aviators at Zeebrugge and Ostend and were the aviation component of the seaward extension of the trench line. This story, related here in detail for the first time, includes rosters of its flight personnel and aircraft and is told with 144 maps and photos and 25 color profiles of its aircraft in the book's 150 pages.

Zeppelin-Staaken Aircraft of WWI

A Centennial Perspective on Great War Airplanes #47 & #48

The Zeppelin-Staaken company was founded by Count Otto Zeppelin of airship fame to build giant bombers. Design of the first of these giant aircraft started in December 1914, barely 11 years after the Wright Brothers' first flight. Despite that, this family of designs became the most successful giant bombers of WWI. This pair of books tells the story of the giant Staaken bombers that were the largest airplanes to see combat in WWI. Many of the 652 photographs in these books have never been published. The scale drawings and color profiles were created specifically for these books.

Zeppelin-Staaken Aircraft of WWI Volume 1: VGO.I – R.VI R.29/16 is the first half of the story of the giant Staaken bombers that were the largest airplanes to see combat in WWI. Volume 1 has 325 photographs, 29 drawings, and 7 color profiles in its 192 pages.

ISBN: 978-1-935881-75-9

\$49.99

Zeppelin-Staaken Aircraft of WWI Volume 2: R.VI R.30/16 – E.4/20 is the second half of the story of the giant Staaken bombers. This story culminated in production of the first all-metal, 4-engine airplane in the world. Volume 2 has 327 photographs, 9 drawings, 14 color profiles, and scale drawings of 5 aircraft in its 186 pages.

ISBN: 978-1-935881-76-6

French Aces of WWI

During WWI the French produced 188 aces. The two volumes of this set include 520 exceptional color profiles of 156 of those aces. This set shows the very colorful airplanes of these aces in wonderful detail and accuracy. Each of the 156 aces included has a brief cameo with his name, rank, units in which he served, and his confirmed victory score. Each profile is captioned with type, serial number if known, unit, and the time period.

French Aces of WWI Volume 1: A–G covers 77 aces with 259 color profiles in its 144 pages.

\$69.99

Fokker Aircraft of WWI Volume 3 | Early Biplane Fighters

A Centennial Perspective on Great War Airplanes #53

Fokker Aircraft of WWI Volume 3 is the third volume in a 6-volume set that details all Fokker aircraft of the war. Fokker became famous due to his Eindecker fighters; his early biplane fighters which followed were failures and brought Fokker to his lowest point. Because these fighters were not successful, information and photographs of them are not plentiful, and this book is an attempt to correct that. The story of these fighters is told here in 470 photos, 30 color profiles, and 6 scale drawings of the D.I-D.V production aircraft and the M.16 prototype in standard 1/48 scale in its 298 pages.

ISBN: 978-1-953201-07-2

Fokker Aircraft of WWI Volume 6 | Foreign Service

A Centennial Perspective on Great War Airplanes #56

Fokker Aircraft of WWI, Volume 6 | Foreign Service covers the foreign use of Fokker aircraft during the war, primarily Fokker aircraft in Austro-Hungarian service. Additionally, there is an appendix showing modern CAD drawings of Fokker's factory at Schwerin, Germany. The book tells the story with 219 photos, 23 color profiles and five color plan views, and 21 drawings in its 148 pages.

ISBN: 978-1-953201-10-2

\$39.99

Fokker Aircraft of WWI Volume 7 | Postwar

A Centennial Perspective on Great War Airplanes #67

This volume details the 26 countries that had WWI Fokker aircraft in military or civilian service post- WWI. In the immediate post-Armistice period Fokker fighters, especially the D.VII, were sought after by the newly emerging European nations and continued in active combat service. The Fokker C.I two-seat reconnaissance aircraft that was too late for service in WWI, had a long military service post-WWI. Fokkers were rebuilt and copied in many countries. The Allies all received Fokkers and used them in different ways, some entering service in the Belgian and US air services. Fokker had brought many airframes with him to the Netherlands and the superlative D.VII fighter was to continue being produced for the Netherlands air services. Fokker aircraft designs of 1918 were to remain in service almost to the outbreak of WW2. These military aircraft also entered civilian service. This extraordinary story is told in detail in 294 pages, 465 photographs (28 in color) and 38 color profiles. Line drawings show four different versions of the Fokker D.VII. This book will be of interest to aviation historians and modellers alike.

On Silver Wings

On Silver Wings is the story of the RAAF and its predecessors in the Golden Years of aviation between the World Wars. The story told in unprecedented detail, the author using official documents from archives in Australia and overseas, as well as conducting interviews with surviving RAAF personnel over a 20 year period.

I read all the manuscripts offered to the Air Force and found yours absolutely amazing; the detail is fantastic and it really fills a gap in our Air Force's history.

Congratulations. Air Commodore John Meier.

Volume 1 has 394 photographs, including 29 in colour, and 17 colour profiles of eight aircraft types. Each aircraft is illustrated by a three-view drawing and official drawings where available.

Volume 2 has 455 photographs, including 28 in colour, and 15 colour profiles of 11 aircraft types. Each aircraft is illustrated by a three-view drawing and official drawings where available.

Volume 3 has 422 photographs, including 19 in colour, and 15 colour profiles of seven aircraft types. Each aircraft is illustrated by a three-view drawing and official drawings where available.

Beardmore Aircraft of WWI

A Centennial Perspective on Great War Airplanes #69

Beardmore Aircraft of WWI tells the story of these little-known aircraft in detail. Noted historian Colin Owers covers both license-produced and original Beardmore designs. The story is told with 130 photos, 7 in color, 21 color profiles, and scale drawings of 7 aircraft types. An EPUB edition is also available for \$9.99.

ISBN: 978-1-953201-69-0 **\$29.99**

The Soft Mud of France

The Soft Mud of France is the story of the author's father, a pilot in the 95th Aero Squadron, who was shot down on November 6, 1918, while distracting nine Fokker D.VIIs of Jasta 19 from attacking a companion. The author's father nearly died in the crash of his Spad and lost his left leg below the knee, a lifelong disability. The author goes into extensive detail of his father's life before and after this near-fatal experience. The story is told in 272 pages, with 229 photos, 208 in color, 64 maps, 62 in color, and color profiles of three Spads. An EPUB edition is also available for \$14.99.

ISBN: 978-1-953201-62-1 **\$49.99**

Shorts Aircraft of WWI

A Centennial Perspective on Great War Airplanes #61, #62, & #63

Shorts Aircraft of WWI by Colin Owers presents the story of these important aircraft in the greatest detail yet published. Colin tells the story in such detail that it had to be divided into three volumes totalling 765 photos, 56 color profiles, and 636 pages. Volume 1 tells the story of early Short aircraft with 297 photos, 21 color profiles, and 3 scale drawings in its 222 pages. Volume 2 continues the story of the Short 184, the most important British seaplane of WWI, with 273 photos, 25 in color, 13 drawings, 5 maps, 19 color profiles, and 1 scale drawing in its 240 pages. Volume 3 tells the story of later Short aircraft with 195 photos, 1 in color, 16 color profiles, and 4 scale drawings in its 174 pages.

Albatros D.V of Lt. Wolf, Jasta 5, July 1917.

Spad 12 of Capt. Georges Felix Madon, Escadrille Spa.38. Madon scored 41 victories.

Memoirs of German Pilots in the First World War | Volume 1

Memoirs of German Pilots in the First World War, Volume 1 includes for the first time complete, new translations of three memoirs by German pilots of the First World War – Hans-Joachim Buddecke, Adolf von Tutschek, and Heinrich Gontermann – who were all killed in front-line service. These translations include Buddecke’s memoir *The Hunting Falcon* (published in 1918), von Tutschek’s *Attacks and Aerial Victories* (also published in 1918), and Gontermann’s letters, notes and diaries, which were published by his grandfather shortly after the war.

There’s been a wealth of publications focusing on the aircraft, biographies, and operations of pilots in 1914-1918. However, there is far less material available to English-speaking audiences on the language, psychology, and emotions of front-line pilots who, in their own words, describe how they were profoundly affected by the experience of aerial combat. The loss of friends, intense encounters with violence, and pervasive fears of death permeate these narratives, which should interest students, scholars and aviation enthusiasts interested in the history of the First World War. Included in its 144 pages are 74 photos (6 in color), and 9 color aircraft profiles.

ISBN: 978-1-953201-42-3

Retail price \$34.99

Memoirs of German Pilots in the First World War | Volume 2

Memoirs of German Pilots in the First World War, Volume 2 is the second volume of the series on German pilot memoirs from the First World War. It includes for the first time complete, new translations of memoirs by aces Erwin Böhme and Emil Schaefer, as well as Willy Rosenstein’s autobiography, which has never before been published. Böhme’s *Letters from a German Fighter Pilot to a Young Girl* (originally published in 1930) and Schaefer’s *From Infantryman to Flier* (published in 1918) provide extraordinary glimpses into the lives of front-line pilots, including their experiences in aerial fighting and their relationships with their families on the home front. Willy Rosenstein’s autobiography is a unique document, made available by the Leo Baeck Institute archive in New York. Rosenstein was a German-Jewish pilot who actually flew as Hermann Göring’s wingman in 1917 and survived the war, only to be persecuted after 1933 under Hitler before he escaped to South Africa where he trained a new generation of pilots who would fly against Nazi Germany.

These fascinating first-hand accounts provide insight into the psychology, language and emotions of pilots who were profoundly affected by the war experience. Their narratives should engage students, scholars and aviation enthusiasts interested in the history of the First World War, as well as, in the case of Rosenstein, postwar traumas and the rise of the Nazi regime. The book has 51 photos and 8 color profiles in its 126 pages.

ISBN: 978-1-953201-50-8

Retail price \$29.99

Memoirs of German Pilots in the First World War | Volume 3

Memoirs of German Pilots in the First World War, Volume 3 is the third volume of the series on German pilot memoirs from the First World War. It includes an entirely new translation of Rudolf Stark’s *The Jagdstaffel—Our Homeland: A Pilot’s Diary from the Final Year of the War* (1932) as well as a first-time complete translation of Hans Waldhausen’s *With Unfurled and Clipped Wings – The Fate and Thoughts of a Downed Fighter Pilot* (1924). Waldhausen’s memoir provides insight into the experience of a combat pilot who destroyed six British aircraft and balloons in September 1917 before he was shot down and captured. With exceptional candidness, Waldhausen offers a glimpse into the fears and frustrations of a front-line pilot, as well as insight into his friendship with Ernst Udet and his experiences trying to escape from a prisoner-of-war camp. Stark’s memoir, which in this new translation includes numerous passages omitted from the original 1930s translation and much more accurate rendering of his language, is unique in its intense description of the experience of aerial combat in 1918. With its extraordinary language and narrative, Stark’s memoir is complex on many levels. He unabashedly confronts the brutality of war, while also reflecting on the awesome experience of flight and his spiritual connection to his aircraft. This book includes images from Stark’s personal photo-album that have never before been published.

Like many other men of their generation, Stark and Waldhausen document the transformative impact of the war experience. They recount the powerful emotions surrounding experiences with violence, especially the act of killing. They also convey the stress of combat and feelings of loss and disorientation in a postwar world that seems alien to them. Their memoirs should engage students, scholars and aviation enthusiasts interested in the history of the First World War.

The volume has 152 pages, 10 color profiles and 90 photographs and drawings.

Based on extensive research, noted French aviation historian David Méchin has documented the personal stories of these aces in the French Aviation Aces Encyclopedia with text, photos, detailed victory tables, and color profiles. Those stories are told in depth for the first time in English in this landmark series of books. Volume 8 tells the stories of 20 aces from Paul Santelli to Pierre Wertheimer, and includes one of the most effective French aces, Paul Tarascon, with 401 photos, 14 in color, 11 color graphics, and 48 color profiles in its 298 pages. It also covers 4 pilots who are special cases, such as pre-war pilots Eugène Gilbert and Célestin Pégoud, and two more aces who became aces after combat in two wars.

Paul Biber's Experiences at Szentandrás Airship Base Near Timisoara

This book is the story of the author's father's work with airships in Romania in the first half of WWI and is the companion to his book about his father's later service at the SVK. The largely unknown story of German Army airships operating from Romania on the Eastern Front and construction of their base and support issues is told here with 277 photos, 27 in color, and 54 other graphics. The book has 194 pages. The massive resources needed to support airship operations and their limited effectiveness in combat show why the German army abandoned airships in favor of Giant aircraft. An EPUB edition is also available for \$14.99.

Paul Biber and the Seeflugzeug-Versuchs-Kommando Warnemünde 1916-1918

This is the author's story of his father, a talented precision mechanic, at Germany's seaplane test command the last two years of the war. In addition to the author's personal story, the book gives an in depth look into the SVK and its operations that has never been presented before. This unique story is heavily illustrated with 357 photos, many previously unpublished, 45 color profiles, 47 drawings, and dozens of miscellaneous graphics within its 294 pages. An EPUB edition is also available for \$19.99.

Oriental Adventures of the French Air Force 1914–1918 by noted historian David Méchin is the story of French aviation, including naval aviation, in the Eastern Mediterranean during the First World War and its interventions in Montenegro (1914), Suez (1914–1915), Serbia (1915), Gallipoli (1915), and especially in Greece (1916–1918) around the city of Salonika in what the French staff called the Front d’Orient, with its extension in 1919 in the actions against Russia and Communist Hungary. For the first time told in English, this little-known part of the history of military aviation in the First World War includes a list of victories and losses on these fronts taken from official French documents. Its comprehensive content includes 425 photos, 16 in color including 13 rare autochromes, 115 color profiles plus 28 unit insignia in color, and 12 color maps in its 388 pages. An EPUB edition is available for \$19.99.

Great Railroad Books from Aeronaut Books!

Cab Forward 4294

This book is a detailed look at the locomotive that is the premier exhibit at the CSRM (California State Railroad Museum) and was written by two former docents and a former engineer on these impressive machines. Many color photos of the 4294 on display show details of its construction and controls and the associated text describes how things work. Historian Scott Inman wrote the introduction that discusses the development of the cab forwards and puts these locomotives in context. The book has 88 pages and more than 70 photos, 49 in color.

Retail price \$29.99

Southern Pacific's Streamlined Articulated | The Iconic AC-9 Class

This book features a photographic anthology of Southern Pacific's iconic AC-9 class articulated steam locomotives. Unlike SP's famous cab forwards, the AC-9 class was designed for operation as coal burning engines on the Rio Grande Division. Ordered shortly after SP's streamlined Daylight locomotives, the dozen AC-9s from Lima also featured a skyline casing and were the only semi-streamlined articulated engines ever produced. Many previously unpublished images are supplemented by historical information, technical specifications, and tender records. It has 174 photos and 152 pages. It is Vol.2 in the new Southern Pacific Cyclopaedia series.

Chinese Workers on the First Transcontinental Railroad

Between 1865 and 1869, thousands of Chinese migrants toiled at a grueling pace and in perilous working conditions to help construct the world's first Transcontinental Railroad. The Central Pacific Railroad first employed 50 Chinese workers on a trial basis as construction progressed through Auburn, California. From there, it is estimated that during peak construction, 12,000 Chinese laborers were employed to help build 690 miles of track, bore 6,213 feet of tunnel, and construct 35 bridges and trestles for the Central Pacific. The ultimate impact of Chinese labor was the completion of Manifest Destiny and the development of the Western United States. 40 pages, 33 photos.
