Kindle editions are available for some titles as noted.

Jasta Colors Volume 1

Jasta Colors Volume 1 is the first volume in a landmark series on this popular and hotly debated subject by the world's leading authority. This volume gives extensive information on research and sources on this topic supported by 223 photos, 61 documents, 4 color paintings, and 55 color profiles, many with plan views and many not seen before, in its 274 pages.

ISBN: 978-1-953201-00-3

Retail price \$69.99

Jasta Colors Volume 2

Jasta Colors Volume 2 is the second volume in a landmark series by the world's leading authority on its subject of the development of German fighter markings. The book begins with the first personal markings of the airplanes 1914 – 1916, as these markings are the model for the markings used by the Jagdstaffel from 1916 to the end of the war. In the focus are the markings of the first 10 German Jagdstaffel in 1916 to the winter of 1916/1917. The story is told with 286 photos, 45 in color, and color profiles of 47 aircraft with 20 supplementary color profiles in its 242 pages.

ISBN: 978-1-953201-01-0

Retail price \$59.99

Manfred von Richthofen's Jasta 11 Volume 1

Manfred von Richthofen's Royal Prussian Jagdstaffel 11 Volume I is the first of a detailed series of books on this unit, its operations, its pilots, and the markings of its aircraft.

Many books have been written about the history of Jagdstaffel 11 and Manfred von Richthofen, but this series is the most comprehensive and complete work ever written on the subject. The author interviewed 19 members of Jagdgeschwader I in the 1970s, a number of whom knew Manfred von Richthofen personally. Their authentic memories and written accounts are an important part of this book series.

The book offers a wealth of previously unpublished material, such as the diary and letters of Pour le Mérite pilots Kurt Wolff and letters from Carl Allmenröder. It contains excerpts of the diary of nurse Käte Oltersdorf, who cared for Manfred von Richthofen after he was wounded, as well as many other contemporary unpublished eye-witness reports.

This information is supplemented by unpublished documents from German archives, including interrogation records of the Allied crews forced to land by Jagdstaffel 11, which are supplemented by corresponding Allied documents and reports. This book includes 210 photographs, 48 contemporary documents, 15 maps, and color profiles of 18 of Jasta 11's aircraft.

Royal Prussian Jagdstaffel 23 is the second book in the milestone series on WWI German fighter units, their pilots, and the colors and markings of their aircraft by the authors. The book has 341 photos, hundreds of them previously unpublished, and color profiles of 68 aircraft created specifically for this book. The author has also created 17 maps showing the location of every victory and loss. The cover painting by noted artist Russ Smith was commissioned especially for this book. 358 pages. **2nd edition** in softbound or hardbound.

Royal Bavarian Jagdstaffel 76 is the third book in the milestone series on WWI German fighter units, their pilots, and the colors and markings of their aircraft by the authors. The book is based on the personal diary of the Staffelführer Lt. Böning who day by day wrote down his experiences – a unique document. It includes excerpts from its war diary, a list of its personnel, and other data. This book was instigated by discovery of a derelict aircraft from this unit in a swamp in France that was restored by the Aéroplane Restoration Management team; the book includes some photos of that process. The story is told with 174 photos, 31 in color, color profiles of 36 aircraft, and 4 maps in its 204 pages.

Manfred von Richthofen, World War I's ace of aces who later became known as the 'Red Baron', received a head wound on 6 July 1917 that knocked him out of the war for several months. Little has been known about his life during his recovery period – until now. This work presents the previously unpublished testimonies of the nurse who tended to Richthofen and the artist who drew him and his unit's airmen while Richthofen was recovering. Both provide contemporaneous, detailed, personal accounts that provide fascinating insight into Richthofen's personality and what he was experiencing at the time without the influence of propaganda or romanticization; and they are supplemented by Richthofen's original hospital medical record and over 320 photographs, some of which have never been seen before by the general public. 206 pages.

ISBN: 978-1-964637-38-9 **\$39.99**

Great Books from Aeronaut Books!

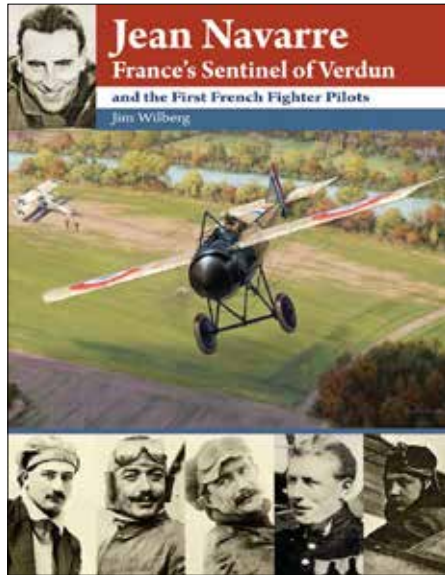

Jean Navarre: France's Sentinel of Verdun and the First French Fighter Pilots

by Jim Wilberg
With aviation's rapid growth in the Great War came air combat and the beginning of fighter aviation. Jean Navarre became the archetypal fighter pilot, the first French ace of aces, who, together with other brave airmen, created fighter aviation. They were a legend in their own time, and this is their story.

- 133 period photos and drawings in 104 pages
- Color profiles of 16 aircraft, 7 with plan views
- Five professional paintings of early air combat
- Brief biographies of Pegoud, Garros, and 10 other important early French aviators. **Offset printed.**

ISBN: 978-1-935881-00-1

\$24.95

Grim Reapers – French Escadrille 94 in World War I

Noted historian Jon Guttman tells the story of a typical French fighter escadrille during World War I with text, 105 rare photos (8 in color), and 16 new color profiles. The book has 94 pages, and is of interest to aviation historians, enthusiasts, and modelers alike.

ISBN: 978-1-935881-40-7

Victoria Cross WWI Airman and Their Aircraft

by Alex Revell (2nd edition)
This book by noted historian Alex Revell tells the story of the 19 British pilots who were awarded Britain's highest award for valour during WWI. These biographies are illustrated with 144 photos and 42 color profiles of aircraft flown by these men, including all the aircraft flown in the Victoria Cross actions. The book has 156 pages and is of interest to aviation historians, enthusiasts, and modelers alike.

ISBN: 978-1-935881-41-4

\$34.99

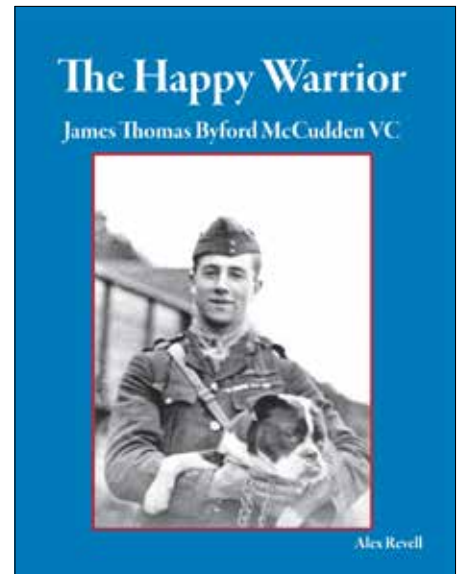

The Happy Warrior

by Alex Revell. This is the story of a remarkable young man: James McCudden. VC; DSO+Bar; MC+Bar; MM; *Croix de Guerre*; America Medal of Honour and Merit. Following his family's military tradition, James McCudden began his career as a professional soldier in 1910, at the age of 15, as a bugle boy in the Royal Engineers. At the outbreak of war

James McCudden was an engine mechanic, but within four years, by sheer hard work and devotion to duty he had risen through the ranks to be a highly decorated Major: a fighter pilot with 56 official aerial victories to his credit. But his success as a fighter pilot was only part of his worth. Unlike many of his contemporaries McCudden studied the tactical aspects of air fighting, applying them to what he saw as his most important duty as a Flight Commander: to minimise the casualties suffered by his Flight. He was tragically killed in a flying accident in July 1918, flying to France to take command of a squadron. The book has 304 pages, 275 photos, and 4 color profiles. An Ebook edition is \$9.99.

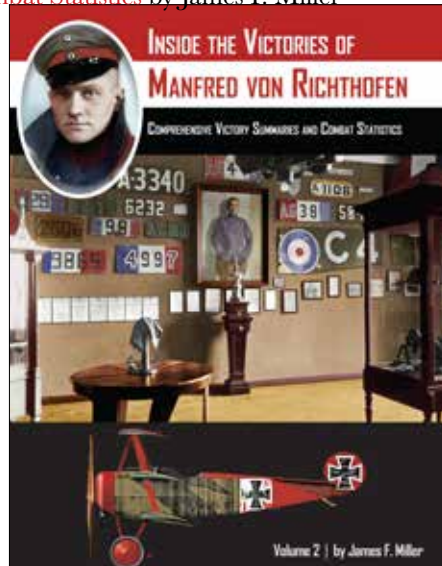

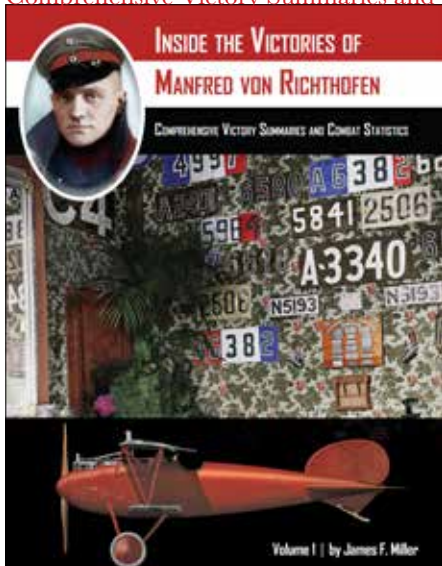

ISBN: 978-1-935881-34-6

Inside the Victories of Manfred von Richthofen

Comprehensive Victory Summaries and Combat Statistics by James F. Miller

This is a heavily-illustrated, comprehensive summary of all 80 victories of the famous Red Baron, the leading ace of WWI. Full details of each victory are given, including color profiles of the aircraft flown by Richthofen, the type and serial of the downed aircraft, the names of the crewmen and their fate, etc. So much information is provided that two volumes were necessary.

Volume 1 covers von Richthofen's career up to his wounding in action on 6 July 1917 and has 203 photos (81 in color), 12 illustrations (8 in color), and 240 pages.

ISBN: 978-1-935881-42-1 \$49.99

Volume 2 covers von Richthofen's career from his wounding in action on 6 July 1917 until his death in action and has 163 photos (44 in color) and color profiles in its 234 pages.

ISBN: 978-1-935881-43-8 \$49.99

Last Gathering of Eagles | Germany's Freikorps and Reichswehr Air Force 1918-1920

November 1918: Defeated and facing internal leftist uprisings and encroachments on its eastern borders, Germany quickly rebuilt its broken army with volunteers and paramilitary units, known as Freikorps. Among them were over sixty tactical aviation units, equipped with the latest aircraft, flown by veteran WWI aircrews. Rarely mentioned in histories and nearly forgotten today, this volunteer air force served with distinction within Germany, on the Polish border, and in the Baltics until the spring of 1920. With the Allied powers slashing their air arms to peacetime strength, it was arguably the most powerful air force in the world. With this account, *Last Gathering of Eagles* restores it and its men to their place in history. Supported by over 175 photos, 34 aircraft profiles, and 15 maps and charts in its 318 pages, it is the definitive work on Germany's post-Armistice military aviation. Its seven appendixes include detailed summaries of every flying unit and a roster of over 1000 men known to have served with them.

On the Wings of the Storm

Captain Richard Duncan, M.C., served initially as a lieutenant with the 1st Canadian Mounted Rifles in the Ypres Salient during World War I before transferring to the School of Aeronautics where he became a Flying Officer with No. 5 Corps Squadron. Unlike a fighter pilot who flew at high altitudes to maintain supremacy of the air, his duty as a corps squadron pilot was the deadliest and most versatile, being the eyes and ears of the Army Corps as artillery observer, strafing enemy trenches, providing photography of the German front line, dropping spies behind German lines, and maintaining contact during battle between the H.Q. and the troops on the ground. Few ever returned from the war. Duncan was one of the few. His memoir is original and complete, including photographs of him and the No. 5 Corps Squadron. The book has 84 photos and 86 pages.

ISBN: 978-1-953201-88-1

Great War Aviation Centennial Series

From Aeronaut Books, by Jack Herris & others. Soft-bound, letter-size (8.5"x11") pages. Free Media Mail shipping in USA. These books are of interest to aviation historians, enthusiasts, and modelers alike.

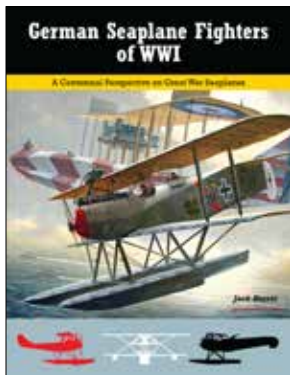

Development of German Warplanes in WWI

A Centennial Perspective on Great War Airplanes and Seaplanes #1

This book describes and illustrates the development of German warplanes in WWI with text, photos, color illustrations, and 30 tables of information including front-line inventories of aircraft by date and specific type. The origins and evolution of each warplane class or category, such as fighters, bombers, and reconnaissance planes are discussed in chapters for each category. Aero engines are also discussed, together with procurement decisions and production quantities. German aviation production and procurement strategies are discussed in the context of the German strategic situation. The three German Fighter Competitions are discussed in particular detail, including all the participating aircraft and their engines. The book is illustrated by 200 rare, contemporary photos, 12 color photos, and 62 color profiles; 148 pages.

German Seaplane Fighters of WWI

A Centennial Perspective on Great War Seaplanes #2

This book describes and illustrates the development of German Navy seaplane fighters in WWI with text, 223 rare, contemporary photos, nine color photos, 27 color profiles, five evocative paintings, and tables of information including production quantities and serial numbers of aircraft and technical specifications. The origins and evolution of each subclass of naval fighter, including single-seat floatplanes, single-seat flying boats, two-seat biplanes, and two-seat monoplanes are discussed in chapters for each class. German naval fighter production and procurement strategies are discussed in the context of the German strategic situation. In addition, the book includes 1/48 scale drawings of 8 aircraft types (the Brandenburg KDW, W16, W19, W25, W33, and W34 and the Rumpler 6B1 and 6B2) in its 150 pages.

ISBN: 978-1-935881-09-4

Nachtflugzeug! German N-Types of WWI

A Centennial Perspective on Great War Airplanes #3

This book describes and illustrates the development of German single-engine night bombers, or N-types, in WWI with text, 54 rare, period photos, 7 color photos, 9 color profiles, tables of information including production quantities, serial numbers of aircraft, technical specifications, 1/48 scale drawings of the AEG N.I and Sablatnig N.I, and 1/72 scale drawings of the BFW N.I. The origins and evolution of the N-class are discussed in the context of the German strategic and tactical situation. The book has 44 pages. ISBN: 978-1-935881-10-0

\$14.99

German Armored Warplanes of WWI

A Centennial Perspective on Great War Airplanes #4

This book describes and illustrates the development of German armored warplanes in WWI, primarily J-class infantry aircraft but including other experimental types, with text, more than 160 rare, contemporary photos, 38 color profiles, and tables of information including production quantities and serial numbers of aircraft and aircraft size and performance specifications. The origin and evolution of the armored warplane designs are discussed in the context of the German strategic situation and the evolving combat environment. Scale drawings of the AEG J.I and J.II and the Albatros J.I and J.II to 1/48 scale are included in the book's 116 pages.

Genesis of Fighter Aviation in WWI

A Centennial Perspective on Great War Airplanes #20

This is the story of the origin and development of fighter aviation during World War I, the first air war, and the legend of the fighter ace. The story combines the exploits of the aces, the evolution of combat tactics, and the technical development of fighter aircraft from its primitive beginnings to the armistice, presaging the aerial arms race that continues today, when the fighter is the key offensive aerial weapon. The book has 550 photos (36 in color), 170 color profiles, and 280 pages, and is of interest to aviation historians, enthusiasts, and modelers alike. An Ebook edition is available for \$19.99.

ISBN: 978-1-935881-36-0

Junkers Aircraft of WWI Volumes 1 & 2

A Centennial Perspective on Great War Airplanes #30 & #31

These volumes by noted historian Colin A. Owers discuss and illustrate the world's first all-metal airplanes, including the development of their all-metal structural technology as well as the aircraft themselves. Numerous photographs and contemporary drawings are included, and each volume includes scale drawings of three aircraft types. These volumes provide the most detailed and complete coverage of these aircraft ever published.

Volume 1 has 356 photographs, including 82 in color, and color profiles of 13 aircraft. Volume 2 has 229 photographs, including 30 in color, and color profiles of 14 aircraft. It also includes 7 color images illustrating factory colors and markings.

Retail price \$34.99

Zeppelin-Staaken Aircraft of WWI

A Centennial Perspective on Great War Airplanes #47 & #48

The Zeppelin-Staaken company was founded by Count Otto Zeppelin of airship fame to build giant bombers. Design of the first of these giant aircraft started in December 1914, barely 11 years after the Wright Brothers' first flight. Despite that, this family of designs became the most successful giant bombers of WWI. This pair of books tells the story of the giant Staaken bombers that were the largest airplanes to see combat in WWI. Many of the 652 photographs in these books have never been published. The scale drawings and color profiles were created specifically for these books.

Zeppelin-Staaken Aircraft of WWI Volume 1: VGO.I – R.VI R.29/16 is the first half of the story of the giant Staaken bombers that were the largest airplanes to see combat in WWI. Volume 1 has 325 photographs, 29 drawings, and 7 color profiles in its 192 pages.

ISBN: 978-1-935881-75-9

\$49.99

Zeppelin-Staaken Aircraft of WWI Volume 2: R.VI R.30/16 – E.4/20 is the second half of the story of the giant Staaken bombers. This story culminated in production of the first all-metal, 4-engine airplane in the world. Volume 2 has 327 photographs, 9 drawings, 14 color profiles, and scale drawings of 5 aircraft in its 186 pages.

ISBN: 978-1-935881-76-6

Idflieg 1910-1918

A Centennial Perspective on Great War Airplanes #94

Before and during the First World War, the Inspektion der Fliegertruppen (Idflieg) was the central procurement office for the complete equipment and personnel of all German air units of the army and, to some extent, the navy. This book describes the emergence of Idflieg and its organization before the outbreak of war as well as the gigantic development during the war years 1914 to 1918.

Idflieg's job was also to steer technical progress by reformulating the ever-changing requirements for aircraft, their equipment, and their armament. New operational measures in the use of the young weapon of war, which had been difficult to develop in Germany during the five years of peace prior to the outbreak of war, were a constant challenge for the engineers and designers in the factories at home. Thanks to the existing mobilization plans for the Luftwaffe, there were only brief supply problems at first. Constant improvements in the organization of the Idflieg ensured that the combat units were kept well supplied, even in times of increasingly scarce resources.

Of special interest to historians, the complete list of aircraft orders (army and navy) is part of the book as well as a list of all air force units. The book has more than 630 illustrations in its 369 pages.

August Euler & His Airplanes 1908 – 1920

A Centennial Perspective on Great War Airplanes #32 & #33

August Euler was a very important German aviation pioneer; he gained German pilot's license No.1, designed and built airplanes, was a flight instructor, created a flight school, and founded an aircraft company bearing his name. After WWI he served as Germany's first Secretary of State for aviation. This is the story of Euler and his aircraft for the first time in English. It is translated and expanded from *Abenteuer Gelber Hund* by Michael Düsing. The book is published in two volumes totaling 440 pages with 396 photos and 136 drawings and other graphics plus 1/48 scale drawings of six Euler aircraft.

Volume 1 has 206 pages, 235 photos, 32 graphics, and scale drawings of 2 aircraft.

Volume 2 has 234 pages, 161 photos, 136 graphics, and scale drawings of 4 aircraft.

Otto, AGO, and BFW Aircraft of WWI

A Centennial Perspective on Great War Airplanes #37

This book tells and illustrates the story of these interrelated companies and development of their aircraft. The Otto Pusher, Ago Pusher, Otto C.I, and the Ago C.I were the only single-engine pusher aircraft used by the German Army during the war, the Prussian Air Service having a strong preference for the tractor configuration. The Ago C.I was used in far greater numbers than the other types and was the type most familiar to Allied airmen. This book illustrates the development and use of these types plus the later, tractor types in 382 photos, 23 in color, and 32 color profiles. In addition, scale drawings of 7 of the most important types are included in the book's 244 pages.

Germania Flugzeugwerke and Its Aircraft

A Centennial Perspective on Great War Airplanes #41

The Germania Flugzeugwerke was one of the little-known companies that were an important part of the WWI German aviation industry. This book is the first complete account of both the company and the aircraft it designed and built. The book has 134 photos, 5 color profiles, and scale drawings of the Germania B.I, C.II, and JM fighter in its 106 pages.

\$39.99

Fokker Aircraft of WWI Volume 7 | Postwar A Centennial Perspective on Great War Airplanes #67

This volume details the 26 countries that had WWI Fokker aircraft in military or civilian service post-WWI. In the immediate post-Armistice period Fokker fighters, especially the D.VII, were sought after by the newly emerging European nations and continued in active combat service. The Fokker C.I two-seat reconnaissance aircraft that was too late for service in WWI, had a long military service post-WWI. Fokkers were rebuilt and copied in many countries. The Allies all received Fokkers and used them in different ways, some entering service in the Belgian and US air services. Fokker had brought many airframes with him to the Netherlands and the superlative D.VII fighter was to continue being produced for the Netherlands air services. Fokker aircraft designs of 1918 were to remain in service almost to the outbreak of WW2. These military aircraft also entered civilian service. This extraordinary story is told in detail in 294 pages, 465 photographs (28 in color) and 38 color profiles. Line drawings show four different versions of the Fokker D.VII. This book will be of interest to aviation historians and modellers alike.

Shorts Aircraft of WWI

A Centennial Perspective on Great War Airplanes #61, #62, & #63

Shorts Aircraft of WWI by Colin Owers presents the story of these important aircraft in the greatest detail yet published. Colin tells the story in such detail that it had to be divided into three volumes totalling 765 photos, 56 color profiles, and 636 pages. Volume 1 tells the story of early Short aircraft with 297 photos, 21 color profiles, and 3 scale drawings in its 222 pages. Volume 2 continues the story of the Short 184, the most important British seaplane of WWI, with 273 photos, 25 in color, 13 drawings, 5 maps, 19 color profiles, and 1 scale drawing in its 240 pages. Volume 3 tells the story of later Short aircraft with 195 photos, 1 in color, 16 color profiles, and 4 scale drawings in its 174 pages.

British Spads | The early Albatros and LFG Roland fighters of the German air service gained aerial ascendancy over the British pusher fighters on the Western Front. The development of the French Spad S.7 fighter in 1916 gave the Allies a fighter that could match their opponents. The British were aware of the Spad and tried to obtain Spad S.7 fighters for their fighter squadrons. This was a difficult process with many setbacks as the Spad was wanted by the French and continually undergoing modification due to service requirements. In order to ensure supply the British decided to build the Spad 7 in the UK. The later use of the Spad S.13 by the British is also covered in detail.

Only two British squadrons used the Spad on the Western Front due to the trials and tribulations of introducing the Spad into British service and in trying to build a foreign fighter in the UK.

The successes of the Spad fighters in action on the Western Front and in the 'side-shows' of the British involvement in WWI, as well as a listing of all Spad fighters used by the British are covered in detail in 222 pages, with 149 photographs, 48 color profiles, a cut-away, and four multi-view scale drawings of Spad 7 variants as used by the British.

ISBN: **978-1-953201-96-6**

Retail price **\$34.99**

USN and USMC Aircraft 1911–1919, Volume 5 | British & Italian Designs continues the story of the the aircraft that the USN/USMC used in Europe in WWI when they could not obtain combat machines from the USA. Crews flew British and Italian machines after being trained in what they needed at the respective fronts that they were assigned to. The men were also taken into British and Italian squadrons to gain combat experience or when circumstances at the front required their services. Their allies had the aircraft but not the trained crews and welcomed the Americans.

The story is told in 262 pages of unprecedented detail from official records and personal reminiscences. The political background is also woven into the story as to why the US air services had to rely on foreign manufactured aircraft and not US manufactured ones. The post-war career of those that served in the USN/USMC is also covered.

The story is illustrated with 256 photographs, nine three view drawings, and 20 colour profiles, as well as original drawings and sketches.

ISBN: **978-1-964637-36-5**

Martinsyde Aircraft of WWI

This book covers the rise of the Martinsyde company from its pre-war WWI beginnings to its eventual demise in the post-Armistice years of the British aviation industry. Even then, its products continued in service given a new life by the Aircraft Disposal Company with sales abroad, to the aviation services of the new states of Finland, Latvia, Lithuania, and Soviet Russia, as well as older states of Spain and Portugal. Martinsyde aircraft were in service throughout all the years of WWI earning fame in Palestine after a disastrous history on the Western Front. Martinsyde produced the fighter with the highest performance built anywhere during WWI in 1917, but it never saw service in the war. In its 265 pages, 261 photographs; 33 in colour including two original WWI colour photographs; 30 colour profiles, three scale drawings of the main types, contemporary drawings and sketches, this book gives an detailed history of the company and its products.

Captured Aircraft in Bulgaria in WWI

This book traces the fate of more than 20 aircraft shot down or captured for various reasons on territory controlled by the Bulgarian army during the First World War. Exhausted by the previous Balkan wars, the Bulgarian Air Force made a tremendous effort to respond to the challenges of the “Great War” and remain competitive with the Allies using aeroplanes in combat.

Its capabilities were limited because the country did not produce its own aeroplanes and there were great difficulties in obtaining aeroplanes and related supplies from Germany. The military command and Bulgarian pilots were trying to compensate for the lack of aircraft with good flying characteristics by using captured enemy aeroplanes.

The book has 108 illustrations and 9 color profiles in its 99 pages.

ISBN: **978-1-964637-30-3**

The Thomas-Morse MB-3

tells the story of the first American-designed production fighter. Designed during The Great War, it first flew in February 1919, after the Armistice. In 1927 it starred in *Wings*, the first movie to win an Oscar for Best Picture. Historian Jan Forsgren tells the story with authoritative text, 93 photos, 24 drawings, 14 color profiles, and 1/48 scale drawings of the MB-3 and MB-3A.

ISBN: 978-1-953201-23-2 **\$24.99**

Swedish Military Aircraft 1911-1926

concerns itself with the airplanes operated by the Marinens Flygväsende (Naval Aviation Service) and Arméns Flygkompani (Army Aviation Company) between 1912 and 1926, prior to the establishment of an independent Flygvapnet on July 1, 1926.

Separate chapters cover the airplanes of Marinens Flygväsende (Naval Aviation Service) and Arméns Flygkompani (Army Aviation Company), as are those ordered or considered, but not delivered. The final chapter includes detailed information on preserved airplanes. The book contains 142 pages, with 165 photos, including 16 in color, and 19 color profiles.

ISBN: 978-1-953201-57-7 **Retail price \$34.99**

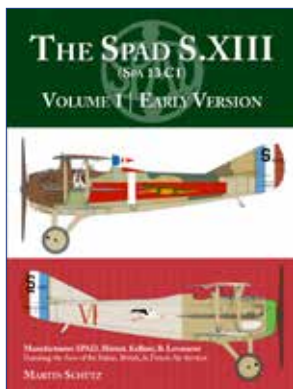

BRITISH AIRCRAFT OF WWI Volume 7 | Experimental Fighters Part 3

British Airplanes of WWI, Volume 7: British Experimental Fighters Part 3 documents nine interesting British experimental fighters of The Great War in more detail than ever before, complete with photos, scale drawings, and color profiles.

The aircraft covered are the A.D. Sparrow Scout, the Alcock A.1, the Austin Greyhound, the Bristol Scout F, the Bristol F.2C Badger, the Dyott AT Battleplane, the Pemberton Billing P.B.29E and Supermarine P.B.31E Night Hawk, and Westland Wagtail.

The book has 151 pages, 149 photographs, 21 color profiles, and scale drawings of all nine aircraft types. It is of interest to historians, enthusiasts, and modelers alike.

ISBN: 978-1-953201-89-8 **Retail price \$39.99**

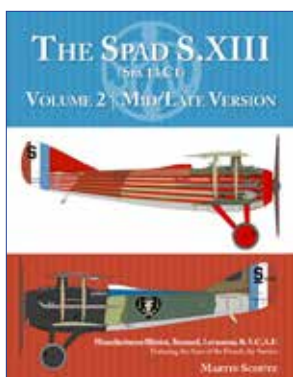

Great War Aviation Centennial Series

From Aeronaut Books, by Jack Herris & others. Soft-bound, letter-size (8.5"x11") pages. Free Media Mail shipping in USA. These books are of interest to aviation historians, enthusiasts, and modelers alike.

The Spad S.XIII was probably the best Allied fighter of WWI. For the very first time all the available information of the early version of the Spad S.XIII fighters is included in one release. The complete background story of the SPAD company with all the important protagonists as well as the details about the legendary Hispano-Suiza engine itself and the important differences between early and late Spad S.XIII are introduced and explained. Detailed information about the different manufacturers, their production blocks, their different camouflage systems, their lettering, hallmarks, and their types of cockades are pointed out in detail. The importance of the additional wing pockets of the early Spad S.XIII for the French as well as the use of the photographic devices is set forth. A detailed look at all the units in French, Italian, and British air services that flew the type as well as detailed listings of all their Spad aces of WWI and of all pilots that also made ace on a S.XIII are included. More than 40 all new scale drawings, more than 70 basic camouflage drawings, and 35 all new 3- or 4-view color profiles of early type S.XIII for France, Italy, and the British Empire complete and round out this extraordinary and meticulously researched work. It is a benchmark for the hobby historian and modeler as well. 287 pages.

V1: ISBN: 978-1-953201-76-8

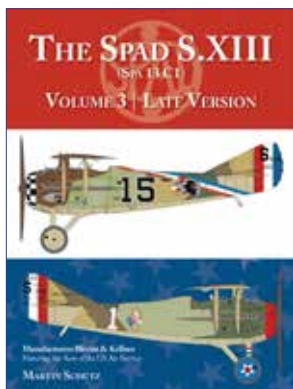

\$59.99

In the second volume about the legendary Spad S.XIII, all information about the mid-production of manufacturer Blériot as well as the late production of the manufacturers Levasseur, Bernard, and S.C.A.F. are included. Their production blocks, their different camouflage systems, their lettering, hallmarks, and their types of cockades are provided in detail. A detailed look on all the units in French Air Service that flew the type as well as listings of all the French and foreign Spad aces of WWI in French Service as well as all pilots that also made ace on a S.XIII are as well included as spotlights on the Imperial Russian and Belgian air services too. More than 40 all new basic drawings, more than 50 basic camouflage drawings, and 31 all new 3- or 4-view color profiles of mid/late type S.XIII in French service complete and round out this extraordinary and meticulously researched work. A benchmark for the hobby historian and modeler as well. 245 pages.

V2: ISBN: 978-1-953201-77-5

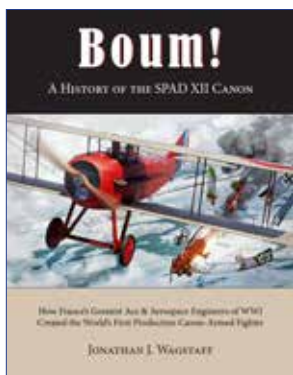

\$59.99

In the third and last Volume about the legendary Spad S.XIII all the available information of the late produced version by manufacturers Blériot and Kellner is provided. Detailed information about both manufacturers including their production blocks, their different camouflage systems, their lettering, hallmarks and their types of cockades used are provided in detail. A detailed look on all the units of the US Air Service that flew the type as well as listings of all the Spad aces of WWI and of those US pilots in particular that made ace on a S.XIII are included. The internal and external bombing systems used on the S.XIII is explained as well as all the propellers in use and their manufacturers. This volume also throws a spotlight on the post war use of the S.XIII. More than 20 all new basic drawings, around 40 basic camouflage drawings and 37 all new 3- or 4-view color profiles of late type S.XIII for the USAS complete and round out this extraordinary and meticulously researched work. It is a benchmark for the hobby historian and modeler as well. 357 pages.

Boum! A History of the Spad XII Canon

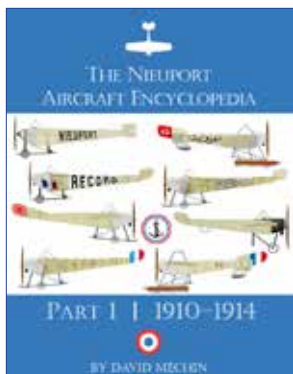

This book charts the remarkable story of the SPAD Canon aircraft of WWI — from early French experiments in canon-armed planes, to the power of one ace's fame and family connections in steering government decisions, and the emergence of SPAD's frontline types and their relatively obscure contribution to the conflict. It also explores the legacy they carried into the next great war.

Boum! is the first English-language study of the fascinating SPAD Canon aircraft. It shines a light on their history through newly rediscovered documents, photographs, and films from archives across the globe. This is a compelling story of innovation, ambition, and the people behind the machines, that will appeal to both general readers and aviation enthusiasts alike.

The book is heavily illustrated with 240 photos (28 in color), color profiles of 21 aircraft, four paintings, many drawings, and scale drawings of the Spad 12 and 14 in its 241 pages.

Great War Aviation Centennial Series

From Aeronaut Books, by Jack Hennis & others. Soft-bound, letter-size (8.5"x11") pages. Free Media Mail shipping in USA. These books are of interest to aviation historians, enthusiasts, and modelers alike.

The Nieuport Aircraft Encyclopaedia (Part 1, 1910–1914)

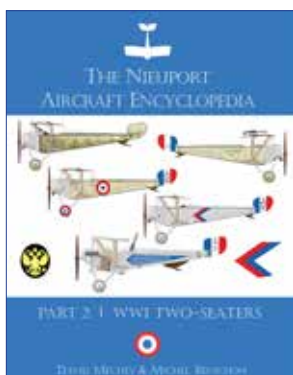

The Nieuport Aircraft Encyclopaedia (Part 1, 1910–1914) tells the story of one of the leading French pre-war aeronautical companies, founded by a brilliant engineer, Edouard Nieuport, who barely had time to see his creations crisscross the skies of Europe. Favoring aerodynamics which gave them speed, the various versions of the Nieuport monoplanes, which served in various air forces until 1917, foreshadowed the Nieuport biplanes which would impose themselves in the skies of Europe at war. The story is told with 330 photos and 38 color profiles in its 204 pages. Centennial Series #93. **eBook edition \$12.99.**

The Nieuport Aircraft Encyclopaedia (Part 2, WWI Two-Seaters)

The Nieuport Aircraft Encyclopedia (Part 2 | WWI Two-Seaters) begins with the story of the Nieuport 10, an aircraft designed by Gustav Delage, who took over management of the Nieuport company after its founder's death. Available in two-seater and single-seater versions, this aircraft had a long line of two-seater successors that soared the skies on all fronts of the Great War. Their story is told through 350 photographs (including 3 autochromes), 54 color profiles, and five scale drawings in its 223 pages.

German Aircraft in Polish Service Volume 1 is the first in a series of books documenting WWI German warplanes in postwar Polish service. The series is based on Polish archives; written by Polish authors it gives the never before told detailed history of these machines in the turbulent postwar period when Poland had to fight for its borders with Germany, Ukraine, and Soviet Russia. Volume 1 covers the Halberstadt Cl.II, Cl.IV, and C.V, the LVG C.VI, and the Hannover Cl.V and tells the story with 94 photos, 6 in color, and 22 color profiles in its 82 pages.

Retail price \$29.99

German Aircraft in Polish Service Volume 2 is the second in a series of books documenting WWI German warplanes in postwar Polish service. Volume 2 continues the series with a detailed look at the Albatros C.XII, C.XV, and J.I reconnaissance and infantry aircraft, as well as the Friedrichshafen G.III and Gotha G.IV bombers used by the Polish air service after WWI. Based on previously unpublished archival sources, this volume reconstructs the operational history of these aircraft in the turbulent early years of Polish independence. Illustrated with over 110 rare photos and 15 color profiles across its 97 pages, it reveals how German designs were adapted to local needs and used in conflicts against Ukraine and Soviet Russia.

Aerial Ascendancy Series

Aerial Ascendancy explores the pre-war evolution of civilian and military aviation, examining the technological, strategic, and political factors that shaped the aeronautical ambitions of Russia, Austria-Hungary, and Germany. Profusely illustrated with photographs, charts, and illustrations, the volumes provide a vivid narrative of formative contributions to military aviation, highlighting the challenges of building an effective air service, including acquiring aeroplanes, training aviators, and pioneering aerial reconnaissance.

Volume I on Russia has 200 illustrations in its 176 pages.

Volume II on Austria-Hungary has 150 illustrations in its 144 pages.

Volume III on Germany has 230 illustrations in its 198 pages.

The Great War's Finest

An Operational History of the German Air Service | Volume 1: Western Front 1914

The Great War's Finest series is the first detailed operational history of the German Air Service during the Great War (1914–1918), the first war in the air. Volume 1 covers in unprecedented detail the creation, organization, and operational history of the *Fliegertruppe* over the Western Front in 1914. Drawing upon a wide range of rare primary sources, Volume 1 provides the reader with a unique narrative that explains the relationship between German air and ground forces and the *Fliegertruppe's* dramatic impact on the epic battles of the Western Front in 1914. Lavishly illustrated, Volume 1 includes 35 color maps, 165 photos and postcards, 72 of which are in color, and several color profiles of 1914 German reconnaissance airplanes in its 378 pages. Extensive order of battle information and other important data are summarized in the appendices. The Great War's Finest is a landmark contribution to the study of aerial operations during World War I. An Ebook edition is available for \$19.99.

Sumner Sewall | Maine's First World War Fighter Ace

by James Wilberg is the story of Sumner Sewall, Maine's WWI fighter ace, during his flying career. Sumner flew with the 95th Aero Squadron, U.S.A.S., of the First Pursuit Group, where he fortunately survived the harrowing experience of being shot down in flames to achieve acedom. Many of Sumner's contemporaries remain in France, having sacrificed their lives in the Great War. Fortunately, Sumner returned home after the war and was prominent in Maine business and political life, later serving as governor of Maine during WW2. The book has 25 paintings and posters, 187 photos, 18 in color, and color profile and plan views of 3 aircraft in its 154 pages.

Eagle of Trieste – Volume 1 | The Man and His Aircraft

Gottfried von Banfield and the Naval Air War Over the Northern Adriatic in WWI

Eagle of Trieste is a two-volume biography of Gottfried von Banfield, the leading Austro-Hungarian naval ace of WWI. So much information, paintings, and color profiles are included that the biography of this remarkable man had to be published in two volumes.

This book is a detailed, heavily-illustrated biography of the leading Austro-Hungarian naval ace of the Great War and the last surviving holder of the Order of Maria Theresa of the Austro-Hungarian Empire. It has 260 photos, 16 in color, 15 color profiles, plus 33 color paintings and postcards. The book has 222 pages.

ISBN: 978-1-935881-60-5

\$49.99

Eagle of Trieste – Volume 2 | Adriatic Air War

Gottfried von Banfield and the Naval Air War Over the Northern Adriatic in WWI

Volume 2 supplements the detailed, heavily-illustrated biography of the leading Austro-Hungarian naval ace of the war with additional information about the air war over the Adriatic that covers specific people, events, and aircraft in detail. It has 229 photos, 20 in color, 50 color profiles plus 24 color paintings and graphics. In addition, scale aircraft drawings of 12 different Austro-Hungarian naval aircraft are included. The book has 196 pages.

Patrolling the North Sea in WWI

Patrolling the North Sea in WWI is the story of Sir Austin Robinson, a young RNAS pilot who flew flying boats and floatplanes over the ocean in search of German airships and submarines. Much of the story is told in Robinson’s own words taken from his letters home by his son-in-law, Robin Jeffrey, and is edited by noted historian Colin A. Owers, who provides supplementary background and photos. This personal memoir tells the human side of the story of the America flying boats whose technical development is told in the two-volume *The Fighting America Flying Boats of WWI* by the same author. The book has 170 pages, 134 photographs, and 16 color profiles.

War Wings Over Galicia 1918–1919

War Wings Over Galicia tells the aviation story of the forgotten 1918–1919 war between a newly resurrected Poland and independent Ukraine. In the aftermath of The Great War and the fall of empires, newly-formed countries struggled with one another over their borders. Poland and Ukraine gathered WWI airplanes from wherever they could and these aircraft supported their respective armies with reconnaissance and bombing missions and occasionally met in aerial combat. Polish historian In this book Andrzej Olejko tells the story of this forgotten conflict from the Polish point of view. The book has 306 photos (19 in color) and 11 color profiles in its 212 pages.

ISBN: 978-1-935881-92-6

On Silver Wings

On Silver Wings is the story of the RAAF and its predecessors in the Golden Years of aviation between the World Wars. The story told in unprecedented detail, the author using official documents from archives in Australia and overseas, as well as conducting interviews with surviving RAAF personnel over a 20 year period.

I read all the manuscripts offered to the Air Force and found yours absolutely amazing; the detail is fantastic and it really fills a gap in our Air Force's history.

Congratulations. Air Commodore John Meier.

Volume 1 has 394 photographs, including 29 in colour, and 17 colour profiles of eight aircraft types. Each aircraft is illustrated by a three-view drawing and official drawings where available.

Volume 2 has 455 photographs, including 28 in colour, and 15 colour profiles of 11 aircraft types. Each aircraft is illustrated by a three-view drawing and official drawings where available.

Volume 3 has 422 photographs, including 19 in colour, and 15 colour profiles of seven aircraft types. Each aircraft is illustrated by a three-view drawing and official drawings where available.

Escadrille C.74 / Sal.74

Escadrille C.74, formed in July 1916, was a Franco-Belgian aviation unit featuring French pilots, Belgian observers, and a few foreign volunteer pilots—a Cuban, an American, and a Czech. Equipped primarily with Caudron G.4, Caudron G.6, and Salmson 2A2 aircraft, it focused mainly on directing artillery fire during ground offensives such as the Battle of Ypres in 1917 and the Allied push to the Hindenburg Line in 1918. The story of this unit is detailed here with 110 pages, featuring 180 photos and 6 color profiles.

Memoirs of German Pilots in the First World War | Volume 1
Memoirs of German Pilots in the First World War, Volume 1 includes for the first time complete, new translations of three memoirs by German pilots of the First World War – Hans-Joachim Buddecke, Adolf von Tutschek, and Heinrich Gontermann – who were all killed in front-line service. These translations include Buddecke’s memoir *The Hunting Falcon* (published in 1918), von Tutschek’s *Attacks and Aerial Victories* (also published in 1918), and Gontermann’s letters, notes and diaries, which were published by his grandfather shortly after the war.

There’s been a wealth of publications focusing on the aircraft, biographies, and operations of pilots in 1914-1918. However, there is far less material available to English-speaking audiences on the language, psychology, and emotions of front-line pilots who, in their own words, describe how they were profoundly affected by the experience of aerial combat. The loss of friends, intense encounters with violence, and pervasive fears of death permeate these narratives, which should interest students, scholars and aviation enthusiasts interested in the history of the First World War. Included in its 144 pages are 74 photos (6 in color), and 9 color aircraft profiles.

ISBN: 978-1-953201-42-3

Retail price \$34.99

Memoirs of German Pilots in the First World War | Volume 2
Memoirs of German Pilots in the First World War, Volume 2 is the second volume of the series on German pilot memoirs from the First World War. It includes for the first time complete, new translations of memoirs by aces Erwin Böhme and Emil Schaefer, as well as Willy Rosenstein’s autobiography, which has never before been published. Böhme’s *Letters from a German Fighter Pilot to a Young Girl* (originally published in 1930) and Schaefer’s *From Infantryman to Flier* (published in 1918) provide extraordinary glimpses into the lives of front-line pilots, including their experiences in aerial fighting and their relationships with their families on the home front. Willy Rosenstein’s autobiography is a unique document, made available by the Leo Baeck Institute archive in New York. Rosenstein was a German-Jewish pilot who actually flew as Hermann Göring’s wingman in 1917 and survived the war, only to be persecuted after 1933 under Hitler before he escaped to South Africa where he trained a new generation of pilots who would fly against Nazi Germany.

These fascinating first-hand accounts provide insight into the psychology, language and emotions of pilots who were profoundly affected by the war experience. Their narratives should engage students, scholars and aviation enthusiasts interested in the history of the First World War, as well as, in the case of Rosenstein, postwar traumas and the rise of the Nazi regime. The book has 51 photos and 8 color profiles in its 126 pages.

ISBN: 978-1-953201-50-8

Retail price \$29.99

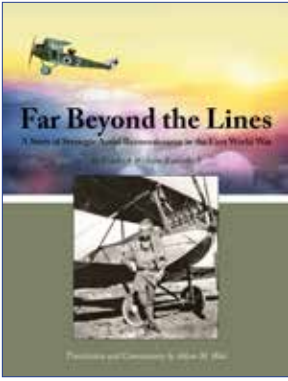

Memoirs of German Pilots in the First World War | Volume 3
Memoirs of German Pilots in the First World War, Volume 3 is the third volume of the series on German pilot memoirs from the First World War. It includes an entirely new translation of Rudolf Stark’s *The Jagdstaffel—Our Homeland: A Pilot’s Diary from the Final Year of the War* (1932) as well as a first-time complete translation of Hans Waldhausen’s *With Unfurled and Clipped Wings – The Fate and Thoughts of a Downed Fighter Pilot* (1924). Waldhausen’s memoir provides insight into the experience of a combat pilot who destroyed six British aircraft and balloons in September 1917 before he was shot down and captured. With exceptional candidness, Waldhausen offers a glimpse into the fears and frustrations of a front-line pilot, as well as insight into his friendship with Ernst Udet and his experiences trying to escape from a prisoner-of-war camp. Stark’s memoir, which in this new translation includes numerous passages omitted from the original 1930s translation and much more accurate rendering of his language, is unique in its intense description of the experience of aerial combat in 1918. With its extraordinary language and narrative, Stark’s memoir is complex on many levels. He unabashedly confronts the brutality of war, while also reflecting on the awesome experience of flight and his spiritual connection to his aircraft. This book includes images from Stark’s personal photo-album that have never before been published.

Like many other men of their generation, Stark and Waldhausen document the transformative impact of the war experience. They recount the powerful emotions surrounding experiences with violence, especially the act of killing. They also convey the stress of combat and feelings of loss and disorientation in a postwar world that seems alien to them. Their memoirs should engage students, scholars and aviation enthusiasts interested in the history of the First World War.

The volume has 152 pages, 10 color profiles and 90 photographs and drawings.

ISBN: 978-1-953201-60-7

Retail price \$34.99

Far Beyond the Lines: A Story of Strategic Aerial Reconnaissance in the First World War, provides a fascinating look at a crucial—yet much overlooked—aspect of the first air war. While tactical reconnaissance squadrons monitored the forward combat zone and immediate rear areas, other select aircrews conducted missions far behind enemy lines. Their objective was to gather military intelligence—both through photographic reconnaissance and visual surveillance of broad areas—and relay the vital information to the Army High Command to assist with operational planning. In the German air service, they were sometimes referred to as “*Fernflieger*.”

One such “*Fernflieger*” was Friedrich Wilhelm Radenbach, whose experiences piloting Rumpler reconnaissance aircraft from airfields located near the center of the Western Front to distant objectives were recorded in a semi-fictionalized memoir titled *Weit im Rücken des Feindes*. It is a fragmentary story he presents, which recounts prominent missions undertaken during his period of service with *Flieger-Abteilung 23*, from October 1917 to September 1918. In between the reader receives glimpses of his personal life and the atmosphere in his German homeland. These provide a somber contrast to some of the more colorful moments in the narrative.

Weit im Rücken des Feindes is the only book-length account written by a strategic reconnaissance pilot on the Western Front during World War I.

Part 1 of *Far Beyond the Lines* provides a thoroughly annotated English translation of Radenbach’s book, which has been supplemented by previously unpublished passages taken from the original manuscript held by the Radenbach family.

In Part 2, Adam M. Wait “takes up the pen” to present an in-depth examination of Radenbach’s book and to explore the activities of *Flieger-Abteilung 23* during the period of Wilhelm’s service with the unit.

The 281 pages of *Far Beyond the Lines* are richly illustrated with 302 black-and-white and color images of airmen, aircraft (with one profile of Radenbach’s Rumpler), and relevant locations. Also included are 59 maps (both standard and pictorial) as well as diagrams illustrating, amongst other things, ground operations and flight routes taken by Radenbach and other members of *Flieger-Abteilung 23*.

First Hats in the Ring tells the riveting story of the First Pursuit Group, USAS, in the Great War. The 1st Pursuit Group was the first American fighter unit to see action, entering combat in March 1918; its four squadrons were the only units to use Nieuport 28s in combat, available because no one else wanted them. In July the group went into the big leagues over Château-Thierry, initially suffering heavy losses to the elite German units. Re-equipped with the Spad 13 as they became available during July, the group fought with distinction over St. Mihiel and the Argonne. This heavily illustrated story is told with more than 490 photos, 40 in color, and color profiles of 57 aircraft in its 270 pages.

Italian Aviation Units in the First World War

Little known abroad, Italian aviation during the Great War grew from just 80 airplanes to a powerful force with 3,000 airplanes in service, and some of its men, like ace Francesco Baracca and the poet Gabriele d'Annunzio are well known in Italy. This work presents all its basic units, the Squadriglie, squadrons, chronicling their histories, their accomplishments, victories and also problems, and reporting all actions, known serial numbers of airplanes and names of the pilots, observers, and gunners that served in them, presenting their names, over 4,750, in a final index. It is the men, almost 600 of whom were killed in service, that this work strives to highlight. All units are presented, including the squadrons of the Italian Royal Navy, the minor units and the squadrons under formation near the end of the war. A general introduction with many orders of battle presents the evolution of the Army and Navy air components, while over 1,600 photographs, most of them published for the first time, and color profiles by Bob Pearson give a dazzling look at the camouflage, insignia and personal markings of Italian aviators. By well-known Italian aviation historian Roberto Gentilli.

The Spad A Series

Spad is famous as the manufacturer of the Spad 13, the best Allied fighter of the Great War. However, Spad started the war with a much less successful aircraft, the Spad A, a two-seater of unusual configuration. This book describes its technical development and combat use. The story is told with 195 photos, color profiles of 18 aircraft, and scale drawings of two types in its 124 pages.

Oriental Adventures of the French Air Force 1914-1918

by noted historian David Méchin is the story of French aviation, including naval aviation, in the Eastern Mediterranean during the First World War and its interventions in Montenegro (1914), Suez (1914-1915), Serbia (1915), Gallipoli (1915), and especially in Greece (1916-1918) around the city of Salonika in what the French staff called the Front d'Orient, with its extension in 1919 in the actions against Russia and Communist Hungary. For the first time told in English, this little-known part of the history of military aviation in the First World War includes a list of victories and losses on these fronts taken from official French documents. Its comprehensive content includes 425 photos, 16 in color including 13 rare autochromes, 115 color profiles plus 28 unit insignia in color, and 12 color maps in its 388 pages. An Ebook edition is available for \$19.99.

Paul Biber's Experiences at Szentandrás Airship Base Near Timisoara

This book is the story of the author's father's work with airships in Romania in the first half of WWI and is the companion to his book about his father's later service at the SVK. The largely unknown story of German Army airships operating from Romania on the Eastern Front and construction of their base and support issues is told here with 277 photos, 27 in color, and 54 other graphics. The book has 194 pages. The massive resources needed to support airship operations and their limited effectiveness in combat show why the German army abandoned airships in favor of Giant aircraft.

Austro-Hungarian Fighter Units of WWI | Volume 1 Fliks 68/J, 72/J, & 74/J

Austro-Hungarian Fighter Units of WWI Volume 1 is the first volume in a new series that will document Austro-Hungarian Fighter Units. It tells the story of the fighter units of a largely forgotten empire in detailed text, photos, maps, and color profiles. Volume 1 tells the story of associated Fliks 68/J, 72/J, and 74/J with 68 photos, 2 maps, 13 color profiles in its 72 pages.

ISBN: 978-1-953201-39-3 \$24.99

This story will enlighten readers about a relatively unknown special group of American aviators in World War One that became known as the "Foggiani". Today, there are few people that know about these special men and there are very few books that describe the day-to-day experiences of these aviators; however, this book is one of them. This is the personal story of one of those American aviators during the Great War that you will not find anywhere else. The journals of S. Stewart Robinson provide a first-person account, in vivid detail, of becoming an American aviator during World War One. You will relive his journey through his daily journal entries. But this story is also a love story between Stewart and a French girl, as he describes the courtship in his journal entries.

Whether you are a historian of the Great War or know very little about it, this story will reveal to you the adventures and experiences of these special aviators. The book has 118 pages and more than 65 images.

Biddle's Rumpler tells the story of a combat in the French skies in August, 1918. Through numerous photos, 21 new aviation art works by renowned artist Jim Dietz, and over 11 aircraft profiles, the aircraft as well as the pilots of that time are brought to life. A historical-fiction novella also adds a new dimension to the story. Cover art by Micheal O'Neal dramatically depicts the encounter of American ace Captain Charles J. Biddle, C.O. of the 13th Aero Squadron, as he duels with "his" German Rumpler. The story is told with 158 photographs and 13 color profiles of aircraft in its 90 pages.

Great Railroad Books from Aeronaut Books!

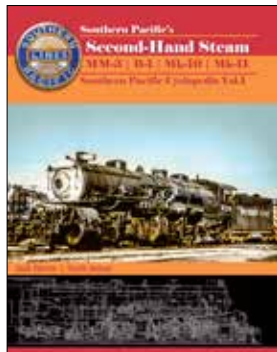

Cab Forward 4294

This book is a detailed look at the locomotive that is the premier exhibit at the CSRSM (California State Railroad Museum) and was written by two former docents and a former engineer on these impressive machines. Many color photos of the 4294 on display show details of its construction and controls and the associated text describes how things work. Historian Scott Inman wrote the introduction that discusses the development of the cab forwards and puts these locomotives in context. The book has 88 pages and more than 70 photos, 49 in color.

ISBN: 978-1-935881-99-5

Southern Pacific's Second-Hand Steam MM-3 | B-1 | Mk-10 | Mk-11

This book is a pictorial anthology of used steam locomotives purchased by the Southern Pacific Railroad, supplemented by historical information and technical specifications. Class MM-3, B-1, Mk-10, and MK-11 steam locomotives are featured. It has 126 pages and 223 photographs. It is Vol.1 in the new Southern Pacific Cyclopedic series.

ISBN: 978-1-935881-98-8

Retail price \$29.99

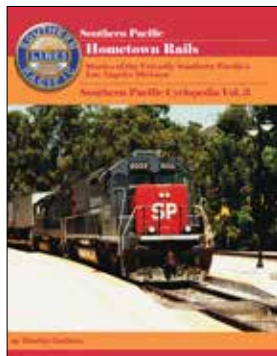

Southern Pacific's Streamlined Articulateds | The Iconic AC-9 Class

This book features a photographic anthology of Southern Pacific's iconic AC-9 class articulated steam locomotives. Unlike SP's famous cab forwards, the AC-9 class was designed for operation as coal burning engines on the Rio Grande Division. Ordered shortly after SP's streamlined Daylight locomotives, the dozen AC-9s from Lima also featured a skyline casing and were the only semi-streamlined articulated engines ever produced. Many previously unpublished images are supplemented by historical information, technical specifications, and tender records. It has 174 photos and 152 pages. It is Vol.2 in the new Southern Pacific Cyclopedic series.

ISBN: 978-1-935881-97-1

Retail price \$29.99

Hometown Rails

Local author and rail fan Tim Crothers has produced a new book documenting the Southern Pacific's Los Angeles Division from the 1970s to its sale in 1996. The book has 246 pages and 401 photographs, 351 in color. It is Vol.3 in the Southern Pacific Cyclopedic series.

ISBN: 978-1-935881-98-8

Retail price \$49.99

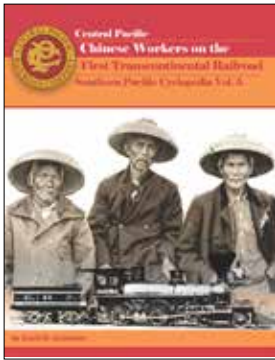

Southern Pacific's Second-Hand Steam GS-7 | GS-8 | C-11 | C-12

This book is a pictorial anthology of the last steam locomotives acquired by Southern Pacific. Classes GS-7, GS-8, C-11, and C-12 locomotives were received used from the St. Louis Southwestern (also known as the Cotton Belt). This book has 134 pages and 212 photographs supplemented by historical information and technical specifications. It is Vol.4 in the Southern Pacific Cyclopedic series.

Chinese Workers on the First Transcontinental Railroad

Between 1865 and 1869, thousands of Chinese migrants toiled at a grueling pace and in perilous working conditions to help construct the world's first Transcontinental Railroad. The Central Pacific Railroad first employed 50 Chinese workers on a trial basis as construction progressed through Auburn, California. From there, it is estimated that during peak construction, 12,000 Chinese laborers were employed to help build 690 miles of track, bore 6,213 feet of tunnel, and construct 35 bridges and trestles for the Central Pacific. The ultimate impact of Chinese labor was the completion of Manifest Destiny and the development of the Western United States. 40 pages, 33 photos.

Southern Pacific's Original Diesel Locomotive

chronicles Southern Pacific Railroad's original diesel-electric locomotive with 131 photos across 75 pages of data and information. Southern Pacific No. 1000 was initially built by the Electro-Motive Corporation in 1939 as Demonstrator No. 804. It was the fourth SW1 constructed by EMC and was sent to Oakland, California for trials by the railroad. Southern Pacific purchased the locomotive on April 1, 1939, beginning a 66-year career in various assignments throughout the State of California. This book describes the unit's operating history with four railroads and details eight paint schemes featured on the locomotive during its lifespan. Since its retirement in 2005, SP No. 1000 is preserved at the California State Railroad Museum in Sacramento alongside the first and last steam locomotive owned by Southern Pacific.

The Atlantic Wall

In June 1944 the Normandy coast became critically important in WW II. Thousands of allied soldiers landed on the beaches on the morning of 6th June to fight for a free Europe. After weeks of fierce battles France was nearly free and within 11 months the war in Europe was over. It was impossible without the allied soldiers, especially the American soldiers. They fought, thousands of miles away from home, for freedom, even for German citizens too.

This book covers the first week of the battle, with many memories of the soldiers of all sides. In 1984, 40 years after the battle, a great commemoration of the landing took place in Normandy. At the La Cambe graveyard a commemoration was held too, of course, with American, British, and French veterans. Here all veterans were one family, especially the veterans of the 82nd and 101st Airborne Divisions and Fallschirmjäger-Regiment 6. It was deeply impressive for me, born after the war.

The book contains 560 photos in its 188 pages.
